BEM Institute

05/2022 - 09/2022

- Conducted research, development, and technology implementation in BEM Riset dan Teknologi Division, collaborating with 17 divisions to support interdisciplinary programs
- Delivered tasks on time under strict deadlines and received positive feedback from more than 10 cabinet ministers and team members

Documentation Coordinator

Kampus Mengajar

08/2023 - 12/2023

- Supported teaching improvement by collaborating with teachers to develop innovative learning strategies and engaging classroom experiences
- Documented daily activities and managed content creation, including Instagram feed design and Instagram Story videos
- Managed an Instagram account that grew to over 1,000 followers
- Served as final video editor for program content watched by over 200+ viewers

PROJECTS

Final Project - Design and Development of Enterprise Architecture Model using TOGAF Framework (Case Study: Dinkominfo Banyumas)

📅 02/2025 📍 Purwokerto, Indonesia

Developed an Enterprise Architecture (EA) model to align business processes and information systems, improving operational efficiency and supporting structured system integration

- Analyzed existing business processes and identified system gaps within the organization
 - Designed an Enterprise Architecture (EA) model to align business processes, data, applications, and technology layers
 - Used EA frameworks (e.g., TOGAF) to define current (as-is) and future (to-be) architecture states
 - Developed recommendations for system integration and process improvement to support digital transformation using Sparx systems
-

Redesign Satu Portal Banyumas website

📅 04/2024 📍 Purwokerto, Indonesia

The redesign process involves analyzing existing system issues, identifying user needs, and developing a more structured, modern, and user-friendly interface

- Identified key usability and structural issues in the existing Satu Portal Banyumas website
 - Redesigned the website to improve UI/UX using Figma
 - Created a more modern and user-friendly design system
-

SIMDIKLAT Mobile Development Project – IT Project Supervisor

📅 10/2024 📍 Purwokerto, Indonesia

Supervised and managed the development planning of the SIMDIKLAT Mobile system for the Jakarta Provincial Government case study

- Managed project scheduling by developing and monitoring Work Breakdown Structure (WBS) diagrams for all defined project activities
 - Estimated project resource requirements, including human resources, hardware/software, and other supporting resources needed
 - Analyzed activity duration estimates and identified dependencies between project tasks
 - Developed project timelines and activity planning using Gantt Chart for progress monitoring and deadline management
 - Created quality assurance checklists to evaluate system outputs
 - Designed the project organizational structure
 - Defined detailed roles, responsibilities, and qualifications for each project team member
 - Developed team performance evaluation forms
 - Established project communication models and coordination mechanisms
 - Prepared Issue Log documentation to record, monitor, and manage project issues
-

Implementation of the K-Means clustering algorithm in determining a person's sleep disorders based on lifestyle

📅 06/2024 📍 Purwokerto, Indonesia

This study applies the K-Means Clustering algorithm to group individuals based on sleep disorders influenced by lifestyle factors using the Sleep Health and Lifestyle dataset from Kaggle

- Successfully applied the K-Means Clustering algorithm for sleep disorder classification based on lifestyle data
 - Identified 3 optimal clusters using the Elbow method. Classified sleep conditions into insomnia, sleep apnea, and normal (no disorder) groups
 - Silhouette score evaluation indicated medium to strong cluster structure, confirming acceptable clustering quality
 - Revealed that lifestyle factors such as physical activity, heart rate, and sleep duration are related to sleep quality and disorders
-

Book Writing and Publishing Project

📅 2023 - 2025 📍 Purwokerto, Indonesia

Collaborated in the development of book content

- Conducted research and collected reference materials to support book content development
- Collaborated with team members in organizing, writing, and reviewing book materials
- Collaborated in the development of more than 6 academic books, including *Introduction to Information Systems*, *Technology Innovation Adoption*, *Business Process Fundamental*, *Professional Ethics*, *Computer and Society*, *Introduction to Information Technology*, *Research Methodology*, and *Database Systems*
